A somewhat lyrical and unscientific view of the problem

Nature Restoration Regulation

Why did the regulation have to be adopted?

81% of protected habitats

63% of protected species

75% of terrestrial ecosystems

... are in poor condition or are dilapidated

38% of fish populations are in very poor condition

1 in every 3 bee and butterfly species is in decline

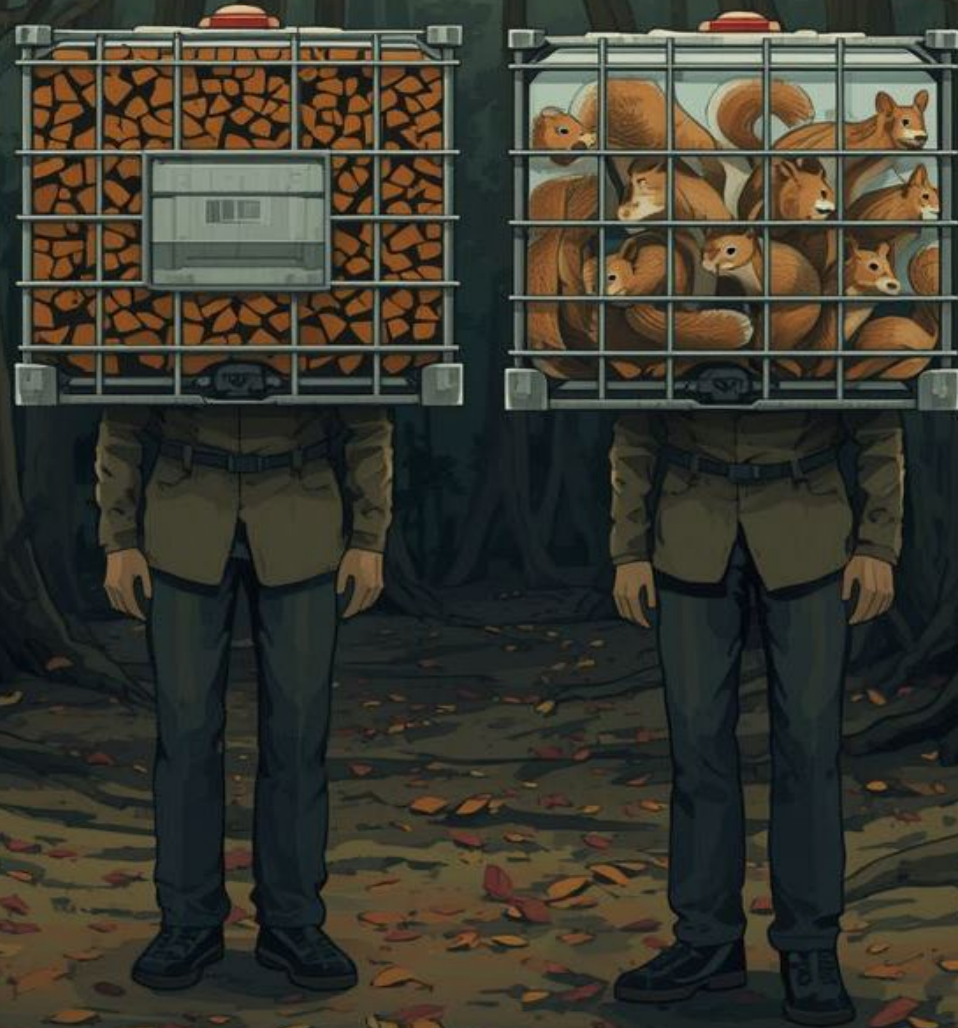

The population of grassland birds has declined by 36% since 1990

Almost 30% of grassland butterflies have become extinct since 1991

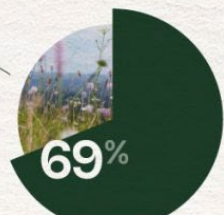

+50% of global GDP is
linked to nature
and the services it provides

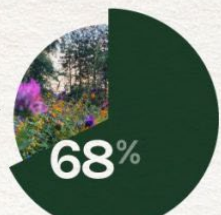

How do we
see nature?
